EDITORIAL

Watching The River Flow

People disagreeing on all just about everything, yeah
Makes you stop and all wonder why
Why only yesterday I saw somebody on the street
Who just couldn’t help but cry
Oh, this ol’ river keeps on rollin’, though
No matter what gets in the way and which way the wind
does blow
And as long as it does I’ll just sit here
And watch the river flow

Bob Dylan, 1971

The first official impact factor is here!

While we write these lines we have just been aware of the
first official impact factor of the Portuguese Journal of Pulmonology by Thomson Reuters ISI! Between the 46 journals
of the respiratory system, we have been ranked 43rd, with
0.355. I think that all Editorial Board, our authors, review-
ers and all Portuguese Pulmonology should be proud of this
historical moment! This is just like entering the “hall” of
fame of the journals of the respiratory category... However
I would like to remind that this giant qualitative and quan-
titive leap that may let us stay optimistic, should compel
us to make it even better in the future!

During the first 6 months of 2011, out of the 63 articles
sent to the PJP, 35 came from Portugal, 6 from Brazil, 3 from
Spain, 3 from Italy, 2 from Taiwan, 2 from Iran, 1 from China,
1 from the USA, 1 from Morocco and 1 from Switzerland. As
to the articles sent from Portugal, 22 came from the North,
5 from the Centre and 8 from the South.

Compared with 2010, numbers of foreign authors
are increasing, supporting the international recognition of
the journal that we proposed when we started as Editors
last year.

As expected we started with the publications ahead of
print; from the 12th of April, authors could download their
articles in advance of paper publication and 48 h later could
see their articles indexed in PubMed as “Epub”. If your arti-
cle is accepted after one month, expect to have it online
and in Pubmed after 2 months (that is 3 months from sub-
mission). For a journal that sometimes in the past took more
than a year to publish an article, we can now offer a fast pub-
lication, which certainly will please our readers and authors.

As you probably may have noticed, our website
at www.revportpneumol.org has been undergoing some
improvements and we expect to have new contents soon.
Moreover, it is now possible to access the journal through
Science Direct.

In this issue

This issue testifies the internationalization of PJP with 5 arti-
cles from foreign authors! Due to this, naturally you will
see only English versions from the papers coming from Spain,
Egypt and Iran...

We finished the Thematic Review series entitle “To
Publish or Perish” with our statistical and methodological
advisor, Luis Azevedo, writing a useful review about “How
to write a scientific Paper – study design and methods”.
Closing this number we include an appealing photo by Miguel
Goncalves, one of our thematic editors.

We now feel that the Portuguese Journal of Pulmonology
is running smoothly and like the Bob Dylan song we think that
we are ”watching the river flow...”.
